Toxic Substance Accounting Summary:

Canadian Mist does not have any substances that require reporting under Phase 1 of the Toxics Reduction Act (O.Reg 455/09). The following substance is reported under Phase 2 of the Act:

Ethanol 64-17-5

The amounts of ethanol created, used, transferred and released during calendar year 2012 are summarized in the table below.

Table 1. Summary of Ethanol Accounting for CY2012

Input/Output	Site-wide Totals
The amount of substance that was created	8,980 tonnes
The amount of substance that entered the facility as the substance itself (used)	17 tonnes
The amount of substance transferred off-site for treatment or recycling	6 tonnes
The amount of substance disposed of on-site	0
The amount of substance disposed of off-site	0
The amount of substance released to air	801 tonnes
The amount of substance released to land	0
The amount of substance released to water	0

Per Section 3(2) of O.Reg 455/09, Canadian Mist is not required to report on the amount of the toxic substance included in the product since the product is intended for human consumption (beverage alcohol) and is produced in a beverage plant under NAICS 312140.

Certification:

As of December 12, 2013, I certify that I have read the report (Canadian Mist Distillers Ltd. Toxic Substance Accounting Report CY2012) on the toxic substance accounting for ethanol, and I am familiar with its contents and to my knowledge the information contained in the report is factually accurate and the report complies the Toxic Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.

David Dobbin
General Manager
