Toxic Reduction Policy Statement of Intent

Canadian Mist Ltd. (Canadian Mist) is committed to playing a leadership role in protecting the environment. Canadian Mist does not intend to reduce the use or creation of ethanol because the toxic substance is created and used in the production of blended Canadian whisky.

Reduction Objectives

Canadian Mist produces blended Canadian whisky. Through this plan, Canadian Mist will determine the technical and economic feasibility of each option to determine which, if any, are viable for implementation at this time.

Description of Facility

Canadian Mist is a producer of blended Canadian Whisky, of which ethanol is a primary component. Canadian Whisky is a beverage alcohol product intended for human consumption; the production, storage and distribution of which is primarily regulated by Excise Canada. The process consists of fermentation, distillation, maturation, and blending.

Toxic Substance Reduction Options to be Implemented

There were no options identified that can be implemented by Canadian Mist to reduce the use, creation, or release of Ethanol.

Plan Summary Statement

This plan summary accurately reflects the content of the toxic substance reduction plan for Ethanol.

Certification by Highest Ranking Employee
